### NeutroCure Newsletter 2022

**Welcome to our third NeutroCure Newsletter.**

#### SUMMARY

Our goal is to develop improved drugs and prodrugs for safe modulation of an immune system. An over-active immune system may lead to chronic inflammation and the cytokine storm phenomenon that can be observed during infection. Our hypothesis is that resolution of inflammation is dependent on the timely production of reactive oxygen species (ROS) by the first inflammatory cell on the scene, the neutrophil, to maximise clearance of pro-inflammatory debris.

During 2022, the drug development programme has been highly successful, with scale-up being achieved successfully and newly labelled compounds being made available to the consortium. These compounds have enabled effective visualisation of targeted drug delivery, for example in tumours.

Our understanding of neutrophil homing continues to develop courtesy of the fine work being undertaken in Spain – below is an image of neutrophils (red) that home back to the bone marrow and find the bone marrow stromal niche (green). These observations are pivotal to bone marrow regeneration.

## NEWS FROM RESEARCH TEAMS

We are delighted to announce that Kanako Wakahashi, Spain, was awarded Best of American Society of Hematology (ASH) recognition for her Abstract "Neutrophils Regulate Bone Formation Via IL-1b Secretion".

Despite the immense difficulties facing people in Ukraine during 2022 on ongoing, the team in Ukraine have had an incredibly productive year. In the summer Galyna and Rostyslav visited Andres and Itziar in Spain, and received excellent training on bone marrow neutrophils.

From our partners in Sweden, [Linda Reimer Rasmusson](#) attended the [FEBS](#) Advanced Lecture Course on the topic "Redox Alterations and Cellular Responses" sponsored by [Redoxis AB](#) on the beautiful Spetses Island in Greece.

Helen Griffiths (SWANSEA) was welcomed to the Fellowship of the Learned Society of Wales.

On 05.04.2022, Honggui Xu (FAU) has successfully completed his dissertation with distinction.

From Spain (CNIC), Andres Hidalgo was named as an EMBO member in 2022

Andres Hidalgo was also recognized in a Fundación Caja Rural de Granada Award during 2022

### PUBLIC SCIENTIFIC PRESENTATIONS ON NEUTROCURE PROJECTS

Representing events are listed (overall 30 scientific presentations)

1. Kanako Wakahashi (CNIC): Oral presentation at the American Society of Hematology (ASH), "Neutrophils Regulate Bone Formation Via IL-1b Secretion"
2. A. Mokhir (FAU). International Symposium on Bioorg. Chem., 28.04.2021. Online format.
3. R. Bilyy (LNMU), **yEFIS** 1 Symposium: Shaping the Future of Immunology in Europe, November 10th & 11th, 2022
4. M. Herrmann (UKER), *13<sup>th</sup> European Lupus Meeting 2022*, 06/10/2022, Stockholm, Sweden. "Extranuclear DNA drives autoinflammation in lupus".
5. M. Herrmann (UKER), *European Lupus Day 2022*, 23/10/2022, Strasbourg, France. „Extranuclear DNA drives auto-inflammation in lupus".
6. M. Hoffmann (UKSH), *EULAR conference*, 02/06/2022, Copenhagen, Denmark. "Inflammatory tissue priming as regulatory factor during arthritis".
7. M. Hoffmann, *European Workshop of Rheumatology Research*, 05/05/2022, Vienna, Austria. "Reset of inflammatory priming and reduction of the severity of arthritis flares".
8. M. Euler, *SFRR-E Annual Meeting – Redox Biology in the 21<sup>st</sup> century: A New Scientific Discipline*, 16/06/2021, Zadužbina Ilije M. Kolarca, Belgrade, Serbia. "Amplification of NET formation and neutrophil aggregation for the resolution of inflammation".

### CONSORTIUM MEETINGS

In 2022, we held three formal consortium meetings on zoom to share knowledge between partners and increase opportunities for early career researchers to present their findings.

## COMMUNICATIONS

Since 2022, we have promoted ourselves on Google Scholar, a forum that enables us to gather our publications together in a searchable format and identify the teams of scholars who are citing our work. Our specific link is <https://scholar.google.com/citations?hl=en&user=16tXi1qAAAAJ>. The figure below shows the increase in recognition and citations of papers related to NeutroCure topics published by consortium members over the past 5 years.

Andriy Mokhir · Martin Herrmann · Andrés Hidalgo · Show all 9 collaborators

Goal: NeutroCure is a European Consortium developing ways to control the spatial and temporal amplification of ROS generation to effectively treat severe pathological conditions characterised by a dysfunction in ROS homeostasis. These conditions include: (a) inflammatory and autoimmune diseases, (b) cancer and (c) myeloablation.
